Table Description

dbdesigner.net

Owner		
 Owner_id	integer	
Owner_name	string	
Owner_mobile	integer	
Owner_mail	text	
Owner_password	text	

Customer		
 Cust_id	integer	
Cust_name	text	
Cust_mobile	integer	
cust_email	text	
Cust_password	text	

Garage		
 Garage_Id	integer	
Garage_Location	text	
Garage_name	string	
Owner_id	integer	

Item		
 Item_id	integer	
Item_name	string	
category	string	
MRP	float	
vehicle_type	text	
Part_no	decimal	
bill_no	binary	

Bill		
 Bill_no	binary	
Bill_amount	float	
Customer_id	integer	
Bill_date	date	
Bill_items	text	

Use Cases

Use case Id: 01

Use case Name: Add item

Use Case Description: Add an item to the stock of the garage.

Actors: Owner

Flow:

Normal Flow: The owner calls the method to add a new item to the stock.

Exceptional Flow: If the owner is not authenticated then the item won't be removed.

Alternate Flow: If a customer wants to sell an item, and the item is approved, the method is called.

Use case Id: 02

Use case Name: Remove Item

Use case description: Remove the item from the stock of the garage.

Actors: Owner

Flow:

Normal Flow: The owner can remove an item

Exceptional Flow: If the owner is not authenticated then the item won't be removed.

Alternate Flow: When a customer buys an item, the product is automatically removed from the stock.

Use case Id: 03

Use case Name: Buy Item

Use case description: Add an item to the card/Bill to be bought.

Actors: Buyer

Flow:

Normal Flow: The buyer selects an item and adds it to the billing list.

Exceptional Flow: If item name is not in the table, it won't be added to the cart.

Use case id: 04

Use case Name: Sell Item

Use case description: Propose an item to be sold to the garage.

Actors: Seller

Flow:

Normal Flow: The seller proposes an item to be sold, with an expected price, which may be accepted or rejected by the owner.

Exceptional Flow: If the item is not above the threshold price, it won't be added.

Use case Id: 05

Use case Name: Compute Bill

Use case Description: Compute the total amount of items, after applying discounts if applicable.

Actors: Buyer

Flow:

Normal Flow: Method called on buyer's confirmation that s/he is done.

Exceptional Flow: If bill number is not present, then error will be thrown.
